1-888-750-5438

Freight lifts installed by Dynamic are guaranteed according to their terms :

2 YEARS Parts and labor

NOT COVERED :

The warranty does not cover repairs and damages caused by negligence, lack of maintenance, accidents and abuse.

Repairs should be made at our St-Jacques, NB plant or at one of Dynamic's authorized service centers.

RECOMMENDED PREVENTIVE MAINTENANCE AND DIRECTIONS FOR USE

- The mechanical components of the doors (hinges, rollers, rails and locks) must be lubricated with an industrial lubricant (avoid the use of grease).
- For vans equipped with a freight elevator, you must follow the manufacturer's recommended maintenance, as stipulated in the manufacturer's manual.
- To prevent deterioration of your floor, avoid sliding merchandise on the floor to move it, as well as avoiding transporting wet merchandise on a wood floor. Water will damage wood floors.
- Verification of the "U" bolts of the substructure should be verified by tightening them on average once or twice a year.
- Lack of maintenance may cause premature damage and thus have a negative impact on the warranty.
- The substructure should be treated with rust proof undercoat every 3 years.
- Never drive with the door (s) open.
